

# HT-SERIES

**Advanced High-Tension Strapping Machine**

## High Tension Strapping Machine

### Features

- Electronic tension control
- Auto strap feeding
- Auto strap ejector
- Short feed sensor
- Strap end ejector

# HT-SERIES

## Advanced High-Tension Strapping Machine

### Unmatched Simplicity

The PPI HT-Series is an advanced high-tension, arch-type strapping machine suitable for a wide range of applications requiring intermediate speed. Machines available for 3/8" or 1/2" strap.

### Auto Strap Ejector

HT-Series comes standard with an auto loop ejection system. The loop-eject clears all unwanted strap automatically if the machine is accidentally activated without a package. This reduces any potential downtime.

### Robust Strapping Head

Reliable and robust strapping head engineered for excellent durability and performance. Using two proximity switches to replace conventional limit switches the HT-Series is a state of the art high tension strapping machine.

### External Electronic Tension Control

External electronic tension control on the HT-Series allows for accurate and simple strap tension adjustments that can be performed easily by any operator.

### Features

- Auto Strap Ejector
- Auto Strap Feeding
- Short Feed Sensor

### Options

- Photo Eye Switch
- Foot Switch
- Palm Pad Switch
- Stainless Steel Frame

### Technical Data

- Strap Width: 3/8" or 1/2"
- Table Height: 810mm (31.89")
- Standard Arch: 600mm W x 850mm H (23.62" W x 33.47" H)  
Available in Other Sizes
- Power Supply: 110V, 60HZ 1ph

### Standard Dimensions
