

TT-SERIES

Advanced Table-Top Strapping Machine

Robust, Innovative Design

Features

- Compact mechanical strapping head
- Electronic tension control
- Weld-cooling timer
- Adjustable table height
- Large lockable main disconnect switch

TT-SERIES

Advanced Table-Top Strapping Machine

Unmatched Simplicity

The PPI TT-Series advanced table-top model strapping machine provides better control and smoother operation than basic table-top machines.

Electronic Tension Control Panel

The electronic tension control on the TT-Series machine allows for adjustment for wider strap tension (8-45kg) which can be easily adjusted on the front of the control panel.

Compact Strapping Head

The TT-Series strapping machine comes equipped with a compact mechanical strapping head with 30% less moving parts than conventional machines reducing maintenance, and with no belts, chains or pulleys the TT has the quietest and smoothest sealing head.

Features

- Large Main Switch
- Adjustable Table Height
- Sensor Controlled Heater
- Dispenser Release Switch

Options

- Conversion Kit for strapping small packages
